

"I really felt it each treatment. I felt it getting better, and better, and my happiness, my joy, everything came back."

 Jennifer / Phoenix, AZ

"It was easy - just felt like some tapping on my head. And that was really it. It wasn't uncomfortable in the slightest."

 Brianna / Denver, CO

"I am just overall happier. That's what I noticed... I honestly do believe that EXOMIND has changed my life."

 Katherine / Phoenix, AZ

EXOMIND™

Ask Your Provider

US FDA clearance: EXOMIND is intended to be used for the treatment of Major Depressive Disorder (MDD) in adult patients who have failed to achieve satisfactory improvement from prior antidepressant medication in the current episode.

EXOMIND™

Strengthen Your Mind

The Future of Mental Wellness

Most patients found the treatment comfortable

Under 30 Minutes

Non-Invasive Drug-Free

Walk-In & Walk-Out Procedure

Used for the treatment of depression, EXOMIND's patented ExoTMS™ technology comfortably stimulates key areas of the brain involving emotional regulation, cognitive function, and self-control.

By activating neural pathways, it helps restore healthy brain activity and enhances neural connectivity for mental wellness.

Frequently Asked Questions

Is EXOMIND right for me?

EXOMIND is designed for individuals experiencing depression. Consult with your healthcare provider to determine if EXOMIND is the right option for your mental wellness journey.

Does it hurt?

Most patients find the therapy comfortable. Sessions are quick, lasting under 30 minutes, and allow you to walk in and walk out with ease.

Will it disrupt my daily life?

EXOMIND seamlessly integrates into your daily routine with minimal disruption.

What are the risks and contraindications?

As with any medical procedure, there are some risks associated with EXOMIND therapy. Please discuss risks and contraindications with your healthcare practitioner before beginning treatment.
